

**Cheakamus Ecosystem Recovery Plan
Project Suggestion Form**

CN Environment will be accepting select project ideas for potential implementation in 2007 that would be designed, managed and completed by CN. These project ideas are separate from a funding program being set up by CN Environment that would allow organizations to submit project proposals for funding. The following form is to be completed by those with habitat enhancement ideas that could potentially be undertaken by CN in 2007.

Please fill out the following as best you can.

Project Information

Project Title and brief description¹:

Project Location: (provide civic address, river km, or identify nearby landmarks)

Project Activity Type:

Habitat Assessment	Habitat Enhancement
Habitat Rehabilitation	Stock Rehabilitation

Species targeted by or benefiting from project activities:

Permitting/Approvals:

Identify Permits and Approvals Likely Required:	Yes/No	Details
Property Owner Permission		
Instream work permits (MoE)		
Instream work permits (DFO)		
Fish collection permits (e.g. salvage)		

¹ Projects may be prioritized and considered based on species targeted by project activities, feasibility

Project Relevance and Significance

Provide a brief overview of the project: (Describe the relevance and significance to Cheakamus ecosystem recovery. How does this project address the sustainability or rebuilding of the target species, what limiting factors does this project address?)

What species, life stage does this project target:

Describe the specific objectives/goals expected to result from this project:

Objective # 1

Objective # 2

Objective # 3
